

Abierto el plazo para la presentación de propuestas a la convocatoria "**Call for contribution of expertise: Full-stack engineer for InvenioRDM and CERN Search**".

Objeto:

Development of new modules and functionalities for the CERN Search and InvenioRDM projects (research data management platform).

Datos de la convocatoria:

Entidad Financiadora: CERN

Fecha de Publicación : 27/05/2019

Dirección web :

Plazo de Presentación de Solicitudes:

Del 27/05/2019 al 12/06/2019

Características:

Profile: Bachelor degree in the field of computer science or a related field. Demonstrated experience with the full-stack development of large software projects, preferably for the web, involving design and development of user interfaces, web application back-ends, front-ends and database schema management. Programming/Software development: advanced knowledge of Python programming, solid knowledge of JavaScript (e.g. ES6); experience with the Flask web framework is a plus; experience working in Open Source is also a plus. Experience in service deployment, configuration management and operation. Knowledge of container-based technologies and platforms (e.g. Docker, OpenShift) is a plus. Design of databases/search engines: experience with PostgreSQL (or similar); experience with Elasticsearch and Redis is a plus. Specific details: Excellent team-working attitude, achieving results through high-quality work and attention to detail. The position may require work during nights/weekends and stand-by duty. Good working knowledge of English.
